

Firestopping Services

Protection, Containment & Safety

Even after taking every possible precaution, sometimes fires occur. When they do, stopping the spread of fire, smoke and toxic gases, containing the damage, and maintaining a safe exit for occupants are crucial.

BRAND SAFWAY™

At Work For You™

BrandSafway's firestopping services help prevent the spread of fire, smoke and toxic gases by sealing openings (such as around ductwork and pipe pass-throughs) and the joints between fire-resistant-rated walls. Our experienced technicians are certified and trained in all leading firestopping products and processes including ROCKWOOL, Specified Technologies Incorporated (STI), Hilti and 3M. Once all firestop applications are installed, they are then properly marked and identified to ensure a smooth inspection process.

› Firestopping Installation Methods

- › Caulk sealants
- › Foams and sprays
- › Foil tape
- › Packing material
- › Pass-through cable devices
- › Tuck-in wraps and strips
- › Putty
- › Duct wrap

› Stay Ahead of IBC Updates

The International Building Code (IBC) Fire Safety Committee [BF] has released new building codes that go into effect in 2020. BrandSafway's firestopping services can help you meet these new standards and pass third-party inspections by even the toughest inspectors.

☑ Penetration Firestops

Meets [BF] 1705.17.1 code/ASTM E2174

☑ Fire-resistant Joint Systems

Meets [BF] 1705.17.2 code/ASTM E2393

In addition to our firestopping expertise, BrandSafway provides the widest range of access and industrial services in the industry.
