

Quik-X™ & Quik-X PRO™

**Advanced refractory
anchoring systems**

BrandSafway's Quik-X & Quik-X PRO Refractory Anchoring Systems require fewer welds and are designed for use in chemical plants, refineries and more. Our innovative anchor systems increase productivity, reinforce refractories against cracking and can withstand extreme temperatures. Ideal for use in the cyclones and air grids of fluid catalytic cracking units (FCCUs).

Quik-X™ Quik-X PRO™

At Work For You®

Innovation – At Work for You®

The next evolution in anchoring systems is here!

Designed with versatility, productivity and durability in mind, BrandSafway's Quik-X™ and Quik-X PRO™ are the best anchoring systems on the market today, improving the safety, speed, strength and accuracy of your refractory work.

Quik-X Layout

Quik-X PRO Translucent View

**16 WELDS
per sq. ft.**
The fewest welds
in the industry

Choose the refractory anchoring system to meet your unique needs

	Quik-X	Quik-X Pro
Advantages		
Safer & more efficient	✓	✓
Fewer welds – 16 welds/sq. ft.	✓	✓
Less metal in refractory lining	✓	✓
Stronger		
Durable independent cell technology	✓	✓
Reinforce refractories against cracking	✓	✓
Less than 0.5% failure rate when combined with BrandTech® Precision Welding	✓	✓
Strength per weld/anchor – 125,000 psi	✓	✓
Faster (70% faster than other hex alternatives)		
Up to 10x faster than traditional hex mesh	✓	✓
44% fewer welds than other anchoring systems	✓	✓
Versatile		
Single metallurgy	✓	
Dual metallurgy – match anchor stud to shell		✓
Change layout designs with ease	✓	✓
Fixed stud length	✓	
Custom stud length		✓

Quik-X is patented and Quik-X PRO is patent-pending.
